Oxyzone T4000 Range

The Tempest 4000 Series ozone generators have been designed and constructed to provide a comprehensive range of options in a simple to use package.

Oxyzone's rugged, powerful range of air cooled corona discharge ozone generators are designed in Australia to suit difficult operating conditions.

- They can be manually operated or automatically output controlled when connected directly to many external devices.
- The ozone output control can be on/off or fully proportional.
- Multiple cabinets can be interconnected to provide higher output levels as required.

Maintenance is straight forward with the spacious cabinets providing easy access to all serviceable components.

Cells and power supplies are interchangeable providing low cost spares stockage for remote locations. It's built in Australia and all components are available 'off the shelf'.

The Tempest 4000 Series of ozone generators are backed by our application knowledge and accessories, including AirSep Oxygen concentrators, Mazzei injectors and Lowara pumps.

100% Australian Made and Manufactured

Oxyzone products are designed and manufactured in Australia to comply with electrical and safety standards. Our service personnel and our spare parts are also in Australia.
